NEEVLY ACADEMY

CERTIFICATE IN PRACTICAL SOFTWARE DEVELOPMENT WITH AI

Turning Ideas into Applications

Have you ever wished you could create your own software, website, or business application but thought programming was too difficult?

Neevly Academy invites you to join a unique hands-on training program designed especially for beginners. Whether you are a student, teacher, entrepreneur, church worker, business owner, or simply someone with great ideas, this course will teach you how to transform those ideas into real software using Artificial Intelligence (AI) and practical project-based learning.

Unlike traditional programming courses that focus mainly on theory, our approach is simple:

Build first. Learn while building.

Throughout the program, you will work on real projects while learning the essential skills needed to become a confident software creator.

What You Will Learn

- How software is designed to solve real-world problems.
- How to use Artificial Intelligence (ChatGPT, Gemini, Claude, and other AI tools) responsibly to build software.
- Basic Python programming in a simple and practical way.
- How to understand and improve AI-generated code.
- How to build Windows desktop applications.
- How to create professional websites using HTML, CSS, and basic JavaScript.
- How to package your applications into standalone Windows executable (.exe) files.
- How to organize, test, and present your software professionally.
- Basic software business and client communication skills.

What You Will Build

During the course, you will create practical projects such as:

- Student Registration System
- Church Attendance System
- Pharmacy Inventory System
- Business Record Manager
- Personal Portfolio Website
- And your own final software project.

Who Can Apply?

No previous programming experience is required.

This course is ideal for:

- Secondary school graduates
- University students
- Teachers
- Entrepreneurs
- Business owners
- Church workers
- Professionals
- Anyone interested in technology and innovation

Course Information

Course: Certificate in Practical Software Development with AI

Duration: 3 Months

Schedule: 2 Classes per Week (2 Hours per Session)

Training Method: Practical, Project-Based Learning

Certificate Awarded Upon Successful Completion

Why Choose Neevly Academy?

- ✓ Learn by building real applications.
- ✓ Small class sizes with personalized guidance.
- ✓ AI-assisted software development using modern tools.

- ✓ Practical projects that strengthen your portfolio.
- ✓ Beginner-friendly teaching approach.
- ✓ Skills that can be applied to business, education, churches, and personal projects.

At Neevly Academy, we believe that software development should be practical, accessible, and empowering. Our mission is to help ordinary people become confident creators of digital solutions that make a real difference.

Register Today! Founding Cohort – 2026

Limited Enrollment: **Only a few students will be admitted into the Founding Cohort to ensure personalized instruction and mentorship.**

Take the first step toward becoming a software creator.
